

DO YOU BELIEVE
OUR FOOD SHOULD
BE FREE,
ORGANIC, AND
LOCALLY GROWN?

- Come and join a group of people working together to make life for future generations full of good health and abundance.
- We've unwittingly disconnected from such an important aspect of being alive, and our disconnection from our food has created a pervasive sickness in the community.
- Our food is at the opposite end of the spectrum of where it could be, and there is so much space to grow veggie gardens, that if we worked and shared together, we may make food free!
